

Realdoit

PRODUCT COLLECTION

01 | COMPANY PROFILE

Company Brief: Realdo Electronic Technology Co., Ltd is one of the professional industry and trade of private enterprises with great self-design, strong development, production and sales teams. We have more than 10 years of experience in manufacturing and marketing of LED products.

Brand: Realdoit

Company's Slogan: "Realdo is really reliable"

Company Reputation: We have good reputation and widespread acknowledgement in our own filed. As classified first-class products, they are widely recognized and trusted by our customers. Our company has experienced R & D technicians and teams, strict quality control process and a professional sales staff and team.

Authorized Certification: Our factories got ISO9001, ISO14000 approval By SGS. Our products have obtained a series of certifications such as UL, ETL, FCC, ES, ErP, CE, RoHS, SAA, INMETRO and E-MARK, All certifications are issued by well-known authorized Laboratories such as BV, SGS and TUV, All approval products went through genuine verification tests without fail and our clients can request for completely test reports files.

Exporting Countries: Since 2008, Our products are exported to more than 80 counties. Main exporting countries are the United States, Canada, Australia, Japan, Russia, Germany, Britain, France, the Netherlands, Denmark, Sweden, Brazil, Mexico and Chile, etc.

Company Patents: We have obtained patent rights of over 70 items up to date. What's more, every year, more new and creative products will be applied for patent by our company.

Market Positioning: Focus on High-end market. Our goal is taking high quality & cost-effective products and excellent & efficient service to win the market.

Technology

China National Hi-Tech Enterprise

Innovation

The first LED linear highbay designer since 2013

Leader

Top 5 highbay exporter in China

Tomcarline

Self-developed power driver with 9 years experience

02 | INNOVATION R&D AND QUALITY CONTROL

We are a qualified supplier: CERTIFICATIONS

Realdoit company is focused on producing high tech and quality products, since the establishment of our company, we have got different recognitions like:

- Independent import and export certificate in 2008
- TUV and ENEC certificate for linear highbay in 2013
- Five China patents in 2014
- Two design European patents in 2014
- One German patent for utility model in 2014
- UL certificate for dozens of products including highbay, linear fixture in 2014
- ISO9001:2015 certificate in 2015
- 6 China patents in 2015
- UL, TUV, CB, SAA, CE, FCC certificate for Tomcarline high power driver in 2016
- ENEC certificate for dozens of products including highbay, flood light in 2016
- Shenzhen High-tech Enterprise certificate in 2016
- 8 China patents in 2017
- China High-tech Enterprise certificate in 2017
- PHILIPS 2017 Strategic partners in 2017
- ISO14001:2015 certificate in 2018
- 4 China patents in 2018
- ENEC certificate for Tomcarline high power driver in 2018
- NSF certificate for Fresh Food safe highbay

Team

We have a qualified and experienced engineering team in our R&D department, including power driver development engineers, optical and structure engineers, industrial designer engineers that makes our company strong enough to offer all kind of solutions.

Tests & Equipments

All new products must pass different strict tests to ensure the reliability in our products, such as high/low temperature test, heat dissipation test, surge test, waterproof test, drop test...

Power driver

After research development and technology accumulation for 8 years, FYTLED has grasped core technologies in LED power driver field and successfully developed DALI dimmable, 1-10V dimmable, 347V high voltage driver, flicker-free, up to 500W high power driver. Tomcarline driver has passed UL, cUL, ENEC, CB, TUV, CE, SAA, RCM, ROHS and FCC certifications, providing up to 10 year warranty.

Patents

We have more than 30 different patents including European patents thanks to the hard work and rich experience from our R&D engineering staff. We will continue to innovate and develop our technology, and to achieve more new hi-tech patents in the future.

New Products

Every 3 months, our R&D department will launch 3 to 5 new products to support customer's business expansion and new market exploration.

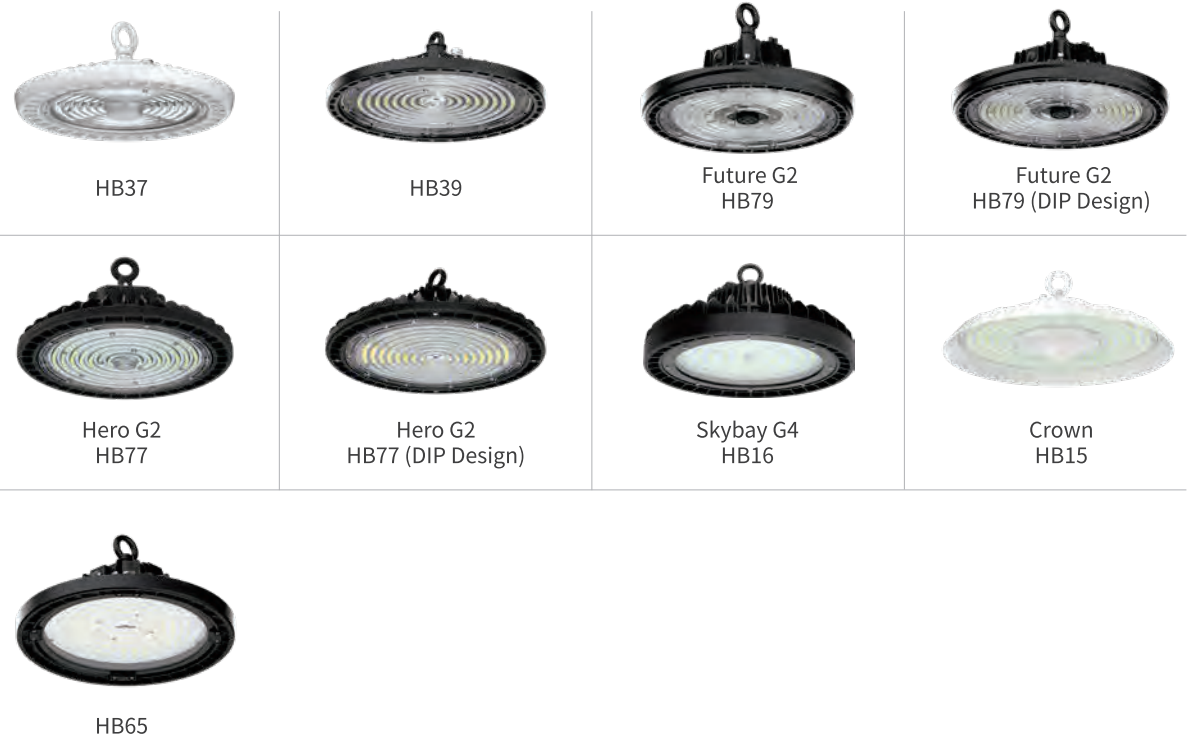

Intelligent lighting control

All of our products are private molds with full lighting control solutions like Dali, ZigBee wireless control, PIR sensor, motion sensor, daylight sensor, emergency and more.

COST EFFECTIVE

HB37 Highbay Light

- SMD 2835 LED Chips, 160lm/W
- Optics of 90° /120° available
- One-piece die-casting aluminum housing, excellent heat dissipation
- Waterproof IP65 design, suitable to damp & wet location
- Cost-effective modern design
- Lighter weight and smaller volume can help customer save freight cost

Certifications

CE RoHS 3 YEAR WARRANTY

HB37 is our new Cost-effective modern high bay light design, it is the first choice for cost saving. One-piece housing, beautiful appearance. Under the premise of ensuring sufficient heat dissipation, the light housing is small and compact, which is convenient for transportation and saves freight. The light Light efficiency can be 160lm/w, and the beam angle of 90° / 120° is optional. It can be widely used in warehouses, factories, production workshops and other places.

Specifications:

Model No.	HB37-100W	HB37-150W	HB37-200W
Dimensions(mm)	Φ280×188	Φ320×188	Φ360×188
Power	100W	150W	200W
Voltage	AC200-240V		
CCT	3000K;4000K;5000K;5700K;6500K		
Luminous Efficiency	160±10lm/W (Ra>80)		
Luminous Flux	16000±1000lm	24000±1500lm	32000±2000lm
CRI	Ra>80		
Beam Angle	90° / 120°		
IP Grade Protection	IP65		

Options Available:

- ▶ 0-10V DIMMABLE
- ▶ CRI > 90 OPTIONAL
- ▶ ±45° ADJUSTABLE BRACKETS
- ▶ PC REFLECTOR
- ▶ WIRE GUARD
- ▶ ALUMINUM REFLECTOR
- ▶ SAFETY ROPE (0.5M LENGTH)

Applications:

**COST
EFFECTIVE**

ZHAGA base

Low UGR

HB39 Integrated Highbay

- High efficiency up to 200lm/W
- Lightweight design
- Low glare UGR < 16
- ZHAGA base version available, strong interchangeability and compatibility
- CRI>70/80
- IP66 protection
- 5 Years warranty

Certifications

CE RoHS 5 YEAR WARRANTY

1: Classic Version - Utilizing a larger aluminum substrate, significantly increasing the heat dissipation area for outstanding thermal performance and minimal light decay. Simultaneously accommodating more LED chips, achieving an impressive luminous efficacy of 200lm/W. The lens adopts a screw + waterproof silicone strip design, ensuring outstanding sealing performance. The power input line incorporates stainless steel waterproof screws, providing excellent waterproof performance. The entire lamp achieves an IP66 waterproof rating, ensuring stable operation in environments ranging from -40° C to 50° C.

2: Intelligent Version - Compatible with ZHAGA base, universally supporting sensors from various brands, reducing SKU complexity.

3: Low Glare Version - UGR<16 glare value, reducing visual fatigue, lowering work-related risks, and enhancing overall work efficiency.

Specifications:

Model No.	HB39-60W	HB39-100W	HB39-150W	HB39-200W
Dimensions(mm)	φ200×78	φ265×86	φ300×86	φ330×86

Applications:

**200
lm/W**

ZHAGA base

Future G2 HB79 Highbay Light

- High lumens efficiency available up to 200lm/W
- High luminous flux up to 40000 lumens
- Product lightweight design
- ZHAGA base, strong interchangeability and compatibility
- CRI>70/80
- IP65 protection
- 5 Years warranty

Certifications

CE RoHS 5 YEAR WARRANTY

The **Future G2 HB79 Highbay Light** is an affordable, direct replacement for HID fixtures that delivers an immediate reduction in energy costs while improving the consistency and quality of light within a space. With high efficiency output up to 200lm/W, it can reach 40000 lumen at most, helps to maximum your energy savings.

The product is equipped with ZHAGA base, which improves the versatility of the product in the field of intelligence. Both motion sensor and PIR sensor can be provided, and the same type of remote controller can work with both motion and PIR sensor.

Specifications:

Model No.	HB79-100W	HB79-150W	HB79-200W
Dimensions(mm)	φ250x173	φ280x173	φ320x176
Power	50W-100W	80W-150W	120W-200W
Voltage	AC200-240V (AC100-277V)		
CCT	3000K; 4000K; 5000K; 5700K; 6500K		
Luminous Efficiency	150±10lm/W (Ra>80) / 180±10lm/W (Ra>80) / 200±10lm/W (Ra>70)		
Luminous Flux 150±10lm/W (Ra>80)	15000±1000lm	22500±1500lm	30000±2000lm
Luminous Flux 180±10lm/W (Ra>80)	18000±1000lm	27000±1500lm	36000±2000lm
Luminous Flux 200±10lm/W (Ra>70)	20000±1000lm	30000±1500lm	40000±2000lm
CRI	Ra>70/80		
Beam Angle	90° / 120°		
IP Grade Protection	IP65		

Multi-angle display:

Options Available:

- ▶ 0-10V DIMMABLE
- ▶ ZHAGA BASE TO MATCH VARIERTY BRANDS OF SENSORS
- ▶ CRI > 90 OPTIONAL
- ▶ 180° ADJUSTABLE BRACKETS
- ▶ PC REFLECTOR
- ▶ ALUMINUM REFLECTOR
- ▶ SAFETY ROPE (0.5M LENGTH)

Applications:

**POWER&CCT
SELECTABLE**

FUTURE G2 HB79 Highbay Light

- High lumens efficiency available up to 170lm/W
- Power & CCT adjustable, flexible solutions for diverse projects
- SAVE SKU, alleviate inventory cost pressure
- ZHAGA base, strong interchangeability and compatibility
- Wireless bluetooth function, convenient App control system
- High luminous flux up to 32000 lumens
- Product lightweight design
- CRI>70/80
- IP65 protection
- 5 Years warranty

Certifications

The **Future G2 HB79 highbay light** is an affordable, direct replacement for HID fixtures that delivers an immediate reduction in energy costs while improving the consistency and quality of light within a space. With high efficiency output 170lm/W, it can reach 32000 lumen at most, helps to maximum your energy savings.

Its Power & CCT adjustable gear function could provide flexible solutions for diverse projects, as well as saving SKU, reduce the inventory cost.

The product is equipped with ZHAGA base, which improves the versatility of the product in the field of intelligence. Both motion sensor and PIR sensor can be provided, and the same type of remote controller can work with both motion and PIR sensor.

Hero G2 HB77 Highbay Light

- High efficiency up to 200lm/W
- High luminous flux up to 40000lm
- Costs-effective modern design
- Plug & play 12V PIR / Microwave sensor
- IP65 protection

Certifications

CE RoHS 5 YEAR WARRANTY

Hero G2 HB77 Highbay Light was finished with the most sophisticated design and the most advanced LED technology, adding a cost-effective category to FYTLED's high bay light series. High grade materials and perfect workmanship provide excellent cooling abilities. With up to 200lm/W efficiency, a variety of lens options, 3 or 5 years warranty, HB77 highbay can provide different combinations, which can meet the requirements of customers in different applications. Diversified product performance but high cost performance is the consistent pursuit of our FYTLED products. HB77 Highbay definitely can be your good choice.

Skybay G4 HB16 Highbay Light

- Max. power up to 300W
- Easy-clean tempered glass cover(PC interchanged except 360mm)
- 1-10V, DALI, 350V, 480V Tomcarline driver available
- 12V Plug & Play smart PIR and microwave motion sensor
- Aluminum/ PC Reflectors available
- 10KV/ 20KV SPD optional
- IP65 protection

Certifications

CE RoHS 5 YEAR WARRANTY

FYTLED Skybay G4 HB16 Highbay Light was improved based on our second generation highbay. The new version G4 highbay is up to 300W and high efficiency 170lm/W, with easy-clean tempered glass cover, which can be available for all kinds of environments, even severe chemical factory. The excellent design with perfect cooling performance, assures the long lifespan of the electronic components.

Specifications:

Model No.	HB16-100W	HB16-150W	HB16-200W	HB16-240W	HB16-300W
Dimensions(mm)	Φ280x188		Φ320x188	Φ360x188	
Power	100W	150W	200W	240W	300W
Voltage	AC100-277V / 277-480V / 50-60Hz				
CCT	3000K;4000K;5000K;6000K				
Luminous Efficiency	140lm/W / 170lm/W				
Luminous Flux 140 lm/W	14000lm	21000lm	28000lm	33600lm	42000lm
Luminous Flux 170 lm/W	17000lm	25500lm	34000lm	40800lm	51000lm
CRI	Ra>70 / 80 / 90				
Beam Angle	110°				
IP Grade Protection	IP65				

Options Available:

- 1-10V/ DALI DRIVER
- HIGH VOLTAGE POWER SUPPLY(277-480V)
- SURFACE MOUNTING/ WALL MOUNTING BRACKET
- 10KV SPD/ 20KV SPD
- WIRE GUARD
- ALUMINUM REFLECTOR/PC REFLECTOR
- PC CLEAR & MILKY COVER(EXCEPT 240W&300W)
- SAFETY ROPE (0.5M LENGTH)

Applications:

Crown HB15 Food Safe Highbay Light

- Extremely energy efficient - up to 140 lm/W
- High Luminous flux - up to 33600 lm
- Unique internal thermal management structure
- Suitable for high humidity, wash down capable
- High quality polycarbonate optics

Certifications

Crown HB15 Food Safe Highbay Light are engineered to address the requirements of the food processing industry and comply with FDA guidelines. The corrosion resistant and non-toxic aluminum exterior is completely smooth and easy to clean. The notably high efficiency up to 150lm/W will significantly reduce power costs and maximize your rebates for energy companies and government rebate programs. A full range of optional features like dimmable drivers, integrated motion sensors, further enhance the usefulness of this fixture.

Specifications:

Model No.	HB15-100W	HB15-150W	HB15-200W	HB15-240W
Dimensions(mm)	Φ460x177			
Power	100W	150W	200W	240W
Voltage	AC100-277V / 277-480V / 50-60Hz			
CCT	3000K;4000K;5000K;6000K			
Luminous Efficiency	140lm/W			
Luminous Flux	14000lm	21000lm	28000lm	33600lm
CRI	Ra > 80 (>70 / 90 optional)			
Beam Angle	110°			
IP Grade Protection	IP65 & IP69K			

Options Available:

12V Plug-and- play PIR sensor

12V Plug-and- play microwave motion sensor

Remote controller for motion sensor and PIR sensor

- ▶ CLEAR PC COVER(STANDARD) / MILKY COVER OPTIONAL
- ▶ SAFETY ROPE (0.5M LENGTH)

Applications:

**65°C
Highbay**

Super wide PCBA,
excellent heat dissipation.

HB65 High-Temp Highbay Light

- High efficiency up to 160lm/W
- Designed for 65°C environment application
- Tempered glass, resistant to high temperature and yellowing
- IP65 protection
- CRI>80
- 5 Years warranty

Certifications

CE RoHS 5 YEAR WARRANTY

HB65 highbay light is designed for the challenging lighting project which ambient temperature up to 65 °C . Thanks to the thermal management technology, the heat from LEDs, aluminum and LED driver is separately disappeared. It can serve maximum 5 years warranty at 65 °C application, such as Rubber factory, Plastic factory, Glass factory and other high temperature factory. Excellent lumen performance 160lm/W helps to minimize the energy consumption.

Specifications:

Model No.	HB65-80W	HB65-130W	HB65-190W
Dimensions(mm)	Φ280*165(mm)	Φ320*178(mm)	Φ360*178(mm)

Tomline V T10V Linear Highbay Light

- 100W / 150W / 200W , available light efficiency up to 140lm/W
- The heatsink is extruded aluminium, pure aluminium 6063, which has excellent heat dissipation effect
- High-quality 2835 LED chips, distributed on a large-area PCB board, the light decay is small
- Elongated PC milky cover, the light is well-proportioned and soft
- Can be flexibly worked with Microwave/PIR sensors, Bluetooth control sensors, emergency power supplies, DALI power supplies, etc
- Low Glare version is optional, UGR<22
- Surface mounting or Hanging rope installation
- IK10 protection
- 5 years warranty

Certifications

T10V is the newest generation Tomline after our many improvements, pursue higher cost performance. Tomline is still one of our best seller now. The 6063 pure aluminum housing provides excellent cooling performance and make sure a long lifespan of LED chips and low light decay. It's 140lm/w, power range is 100W to 200W, can be widely used in warehouses, factories, workshops, logistics centers, exhibition halls, large supermarkets, indoor gymnasiums and other places.

Specifications:

CRI	Ra > 80		
Beam Angle	110°		
IP Grade Protection	IP42		

Options Available:

12V Plug-and- play PIR sensor

12V Plug-and- play microwave motion sensor

Remote controller for motion sensor and PIR sensor

- ▶ 0-10V / DALI DRIVER
- ▶ HIGH VOLTAGE POWER SUPPLY(277-480V)

Applications:

Tomline C T10C Linear Highbay Light

- High lumens available up to 150 lm/W
- High luminous flux up to 30000 lm
- Excellent heat dissipation due to aluminum body
- Long lifetime due to high quality LED chips and drivers
- D-MARK tested for paper production, wood processing

Certifications

This **Linear Highbay Light TOMLINE Series** was specially designed for industrial environments. The massive aluminum body provides excellent cooling performance and make sure a long lifespan of LED chips and low light decay from them. The large and break-resistant polycarbonate cover provides a perfect light distribution. This product is an ideal replacement for all sorts of traditional industrial lamps. For different applications this item is available in three versions: standard, lumen plus, and dust free version.

Certifications

The **Starline T31D Linear Highbay** is a powerful and energy-efficient LED light fixture available from 80W to 300W. It was designed for tall halls, high warehouses, loading areas and freight yards. Various lenses for different beam angles enable this linear Highbay to be efficiently used in heights up to 30m. Its waterproof aluminum alloy housing and the high quality polycarbonate lenses make it dust tight as well as water and impact resistant for use in harsh environments.

This extremely robust light can be flexibly configured for use in a very wide application range. suspended or surface mounted installation will provide a perfectly homogeneous light distribution.

The **Starline Extra 3103 Linear Highbay** is a powerful and energy-efficient LED light fixture available from 80W to 300W. It was designed for tall halls, high warehouses, loading areas and freight yards. Various lenses, especially the asymmetric beam angle is very good option for warehouse with racks. This linear Highbay can be efficiently used in heights up to 30m. Unique tempered glass design is perfect choice for harsh condition and easy for cleaning.

The linear robust design provides homogeneous light distribution which is not glaring too much for operators in warehouse.

T512 E-Power G2

E-Max G2 T502 Tri-proof Light (Single use)

- Sleek and slim design to save shipping costs.
- Easy installation and best replacement for traditional fluorescent fixtures.
- Ambient temperature resistant from -40~+40°C , suitable for multiple applications.
- Flicker-free driver makes soft light and reduces eye fatigue.
- IP65 for harsh conditions

Certifications

E-max G2 T502 Tri-Proof Light is the optimal solution for areas with harsh environmental conditions. Its main housing is made from a single mold and its end-caps are tightly fixed which allows for optimal water and dust resistance. The connection cable is secured by a water tight PG cable screw. Its uniquely rugged and low-profile design is ideal for space-constrained industrial applications requiring a durable and energy-efficient solution.

Specifications:

Model No.	T502-20W06	T502-35W12	T502-45W15

Applications:

E-Power G2 T512 Tri-proof Light

- Highly energy efficient - up to 150 lm/W
- IP65 & IK10
- Rotary knob for tool-free wiring and fast installation
- Single use or linkable use
- Flicker-free driver makes soft light and reduces eye fatigue
- Microwave motion sensor available
- 5 Years warranty

Certifications

E-power G2 T512 Tri-Proof Light is a highly durable and robust Tri-Proof light designed for production areas, parking facilities and any other area of application where harsh conditions have to be countered. Its polycarbonate housing is cast from a single mold and therefore absolutely dust and waterproof. Its Ingress Protection rating of IP65 & IK10 assures that it can truly be used indoor and outdoor under all conditions. The flicker-free driver design make the light uniform and without glare, improved end-caps featuring design allow for tool-free wiring and assure a very fast and almost effortless installation.

Easy connect T201 Linear Light

- Quick and easy installation without needing open the fixture
- Highly efficacy up to 140 lm/W
- Can be linkable for continuous line
- No gaps or seams between the fixtures

Certifications

Easy connect T201 Linear Light is an energy efficient, low maintenance alternative to traditional fluorescent in a variety of retail and industrial lower ceiling applications. Available in single or continuous use, also the lamps can quickly snap together for long continuous line, making an easy installation with no gaps between the fixtures. It can be suspended or surface-mounted and giving an uniform lighting dist. but on for the different applications.

- ▶ Microwave motion sensor available for single use

Applications:

E-Lot T204 Linear Light

- High efficacy up to 140lm/W
- Flicker free driver, no strobe
- Single installation or use as a continuous line
- Seamless connection and cable link optional
- Quick and easy installation
- IP42 & IK10
- Slim and durable design

Certifications

E-Lot T204 Linear Light is a slim and durable design fixture ideally to replace commercial fluorescent. Easy non-gap connection allows high efficient installation. Optional cable connection offers flexible linkable space between fixtures according to different application requirements. Power range from 10W to 40W makes this lamp a good choice for various applications, such as offices, stores, supermakets,restaurants,schools etc.It can be suspended or surface mounted.

Specifications:

GARAGE LIGHT

1.5

Inpark Parking Garage Light

- Unique round shape and low profile
- Impact-resistance polycarbonate optical diffuser
- Built-in sensor on/off
- High efficiency up to 130 lm/W
- IP65 grade protection

Certifications

Our **Inpark Parking Garage Light** is made of die-cast aluminum heatsink with good heat dissipation performance. Its use effect is highly praised by customers and its shape is a round design which is different from most garage lights on the market. The product was originally designed for use in indoor parking, underground parking, building parking, public areas, corridors, and underground passages. With a highly reliable LED light engine and impact-resistant polycarbonate optical light diffuser, the product has a low profile design and a protection rating of IP65 for both indoor and outdoor applications. The lamp has built-in sensors that turn it on at the right time and in the right place. In addition, the low profile design gives this product an architectural appeal, which makes it an ideal choice for limited space.

Specifications:

Model No.	CP-40W	CP-60W

HL101 Explosion-proof & Hazardous Location LED Lights

- High explosion-proof level, meeting the requirements for use in explosion-proof gas zone 1 and dust zone 21;
- Multiple optical angles options suit for different scenarios, provide uniform illumination and soft lighting;
- Robust explosion-proof glass (≥ 12mm thickness) resists to drastic heat changes, exceed the impact strength requirements of the national standard by more than twice;
- Strong seismic resistance. Pass 3G vibration testing. The lighting components are not easily detached, ensuring safety and reliability;
- Strong wind resistance. Tested by a level 17 typhoon, the mechanical structure of the lighting fixtures is firmly connected, not easily bent or deformed, and the installation is safe and reliable;
- Redundant explosion-proof structure design, which exceeds the national standard of explosion-proof distance by 1.3 to 1.6 times;
- Explosion-proof linkable installation mode is available, Saving installation costs;
- High power factor increases the grid utilization. Dual stage PFC circuit and flicker-free design;
- Built-in radar sensor for efficient and energy-saving lighting.

Certifications

Certain environments require a higher level of safety. Sites may be marked as hazardous locations in the event of a fire or explosion conditions exist because of the presence of flammable gases or vapors, flammable liquids, flammable dusts, or are prone to flammable fibers.

HL101 is the perfect solution to these hazardous applications. As a Class I Division 1 luminaire, it protects against possible power surges and sparks by securing all wiring within. It can be pole or yoke mounted, using a 360-degree rotating bracket increases the flexibility of product installation. It is also corrosion resistant with tempered glass for added durability.

HL201 Portable Luminaire

ATEX ZONE 0 rated rechargeable lantern/scene light

- High explosion-proof design, adopting intrinsic safety "ia" circuit design, can be used in hazardous environmental areas such as gas zone 0 and dust zone 20 with the highest explosion-proof level;
- Handheld and strap-on carrying methods meet different usage requirements;
- High capacity battery package ensure ultra long battery lifetime. (High brightness $\geq 10h$ battery life; Low light brightness ≥ 100 hours of endurance);
- One button adjustment of the spotlight or floodlight illumination mode to meet the needs of projection and illumination range;
- Visual power display function which can monitor power at any time;
- Sound and light warning design. Combined with red flashing warning light and alarm buzzer, our products can reduce safety hazards for operators;
- Aluminum alloy lamp holder can rotate up and down 90 ° to meet the different angles lighting needs;
- The shell is made of high-strength alloy aluminum and explosion-proof special plastic. With light weight but high strength, it can be dropped from any angle at a height of 1 meter in a low temperature of -20 °C without damage;
- IP66 industrial dust-proof and waterproof grade, meeting the requirements for outdoor use in rainy days.

Certifications

The HL201 is developed for use in hazardous locations, a portable scene light platform provides sufficient illumination and cordless operation to eliminate trip hazards. Lightweight and rechargeable HL201 is ATEX rated for Zone 0 location. Flexible switching design with high, medium and low illumination with optional small spot light beam and wide flood beam. High-impact ABS thermoplastic housing and waterproof construction allows the use of this lamp even under harsh working conditions.

Model No.	HL201-10W		
Dimensions(mm)(l,w,h)	267×100×132		
Power	10W		
Input voltage (adapter)	AC100-240V 50/60Hz		
Working Modes	High mode(10m)	Medium mode	Low mode
Luminous Flux	$\geq 1000lm$	$\geq 240lm$	$\geq 70lm$
Run Time	≥ 10 hrs	≥ 24 hrs	≥ 80 hrs
Carrying method	Handheld / Shoulder strap		
Battery Type	Intrinsically safe rechargeable explosion-proof ternary lithium battery		
Charging Time	≤ 11 hrs (fully charged)		
Warning Function	Caution light+Buzzer alarm		
CCT	3000K / 5700K		
CRI	Ra > 70		
Light Beam	Spot light (20°) / Flood light (40°)		
IP Grade Protection	IP66

reddot winner 2023

HL606 LED Portable & Explosion-proof Light

- High explosion-proof rating protection, meeting the explosion-proof of Gas Zone 1 and Dust Zone 21 hazardous location' s use requirements;
- High-capacity battery, super long battery life, the running time of full brightness $\geq 10h$, and minimum brightness $\geq 100h$;
- Triple protection battery pack design, high-strength aluminum alloy shell, battery pack sealed with insulating glue, multi-functional over-protection battery control board, to ensure the battery safety;
- Easy to swith the Spotlight mode and Floodlight mode, meeting the needs of different projection and irradiation ranges in the field environment;
- Explosion-proof memory type stepless dimming function, realize the same brightness as before turning off the light;
- Two-head lamp design design, each lamp head convenient to rotate 90° vertically and 330° horizontally, to achieve customized lighting range;
- High-strength aluminum alloy lifting bracket, the lamp can be folded up, and the resistance lifting design prevents the bracket from pinching hands;
- The shell is made of high-strength alloy aluminum and explosion-proof special plastic, lightweight, high strength, and it will not be damaged when dropped at any angle from a height of 1 meter and a low temperature of $-20^{\circ}C$;
- IP66 protection, meeting the requirements of outdoor use in rainy days;
- Foldable bracket support, can resist Strong Breeze without dumping.

Certifications

HL606 is a retractable and portable, lightweight explosion-proof light with long service life time. Small and wide beam angle lens provide different light illumination. Users could check the battery status, dimming, light mode, beam angle by the OLED multi-function screen. This functional and easy-carrying explosion-proof light is ideal for emgency outdoor working in hazardous environments, such as oil and gas refineries, petrochemical facilities, oil fifield, and daily small construction and maintenance, hazardous locations, emergency rescue temporary projects, etc.

HL180 LED Explosion-proof & Hazardous Location Light

- High explosion-proof grade, meeting the use requirements of zone 1 and zone 21 hazardous locations;
- Hemispherical optical design of the milky cover, uniform illumination, soft light, to meet the explosion-proof light aging design requirements;
- High explosion-proof glass, thickness $\geq 10\text{mm}$, heat-resistant drastic changes, impact strength requirements exceeding the national standard 2 times more;
- 3G Anti-seismic rating, the lamp parts are not easy to fall off, safe and reliable;
- Strong wind resistance, passed the 17-level typhoon wind test, the mechanical structure of the lamp is firmly connected, not easy to bend and deform, and the installation is safe and reliable;
- Redundant design of explosion-proof structure, the design exceeds the national standard by 1.3 to 1.6 times the explosion-proof distance, explosion-proof safer;
- Outdoor stainless steel bracket, the housing is sprayed with AKZO anti-salt powder, strong corrosion resistance;
- High power factor, high grid utilization, double-stage PFC circuit, flicker free;
- Built-in radar sensor, energy-saving lighting;
- Hanging mounting bracket with gear adjustment disc, stable and firm limit, to have 180° rotation fixed.

Certifications

The HL180 is a reliable and safe LED explosion-proof luminaire, designed for lighting application in harsh and hazardous areas with oil & chemical gas, dust. It is good lighting solution for tank fields and corridors. The high grade of explosion-proof and anti-corrosion rate, suitable for offshore platforms. Intelligent dimming, sensor control and emergency battery back-up saves energy and extend service life.

- Built-in radar sensor, energy-saving lighting;
- Multi-style mounting brackets, wall-mounted adjustable angle installation, hoop-type round pole installation, ceiling-type flat installation.

Certifications

The HL160 is a linear LED explosion-proof luminaire, designed for application lighting in harsh and hazardous areas, such as oil storage tank areas, petrochemical installation platforms, and hazardous chemicals areas, which are certified with international strict testing standards of IECEx, ATEX, and CNEX. Optional DALI and sensor control design reduce energy, maintenance, and manpower costs. Integrated emergency battery backup design supports necessary efficient lighting with 5W and working time over 90mins. Versatile and flexible mounting options provide an ideal solution for high vibration, impact, and hose-down in drilling applications.

SLA101 Street Light

- High luminous efficiency-up to 150 lm/W
- Extremely cost-effective
- Smooth & dust-free design
- Excellent heat dissipation with robust and durable aluminum housing
- Fast installation of horizontal/vertical installation with an adjustable angle of $\pm 15^\circ$
- IP66 for outdoor applications, especially for bad weather conditions

$\pm 15^\circ$ adjustable

Certifications

SLA101 Street Light is one of the highest cost-effective lights in FYTLED. It has a smooth and dust-free design, which can prevent leaves or bird droppings staying on the light for a long time. Its robust and durable aluminum housing can provide excellent heat dissipation. The high quality 3030 chips provide high luminous efficiency up to 150 lm/W, and high quality PC lens can be with $140^\circ \times 60^\circ$ beam angle. What's more, there are various choices of power, ranging from 20W to 150W. Convenient and easy installation also be provided: horizontal/vertical installation, adjustable angle of $\pm 15^\circ$, and slip-fitter for 60/42mm poles. You can apply it to various road situations, because it has IP66 for outdoor applications, and that will be OK even for bad weather conditions.

SLE680 Street Light

- Extremely energy efficient - up to 140 lm/W
- High Luminous flux - up to 21000 lm
- Various professional optics for optional
- Various smart control for optional
- Maintenance Spring flap for quick access to the driver compartment
- Excellent heat dissipation and modern design
- Slim and compact profile for maximum wind resistance
- Durable and long-lasting power driver
- Circuit interrupter for maintenance access optional
- Adjustable installation angle (vertically or horizontally)
- IP66 IK09 10KV protection

Certifications

SLE680 is a unique design lighting for streets, parks, roads, and urban areas. A wide wattage range from 25W to 150W, various professional optics for optional, and a suitable selection of slip-fitters for different pole sizes guarantee the right setup for most areas of application and different city road development. If needed, a quick maintenance spring flap allows just one person can open the cover fast and easy access to the driver compartment.

Optional ZHAGA base for difference sensors, NEMA base for photocell, timer control dimming, 1-10V dimming, DALI dimming, these various smart control potentially enhances power savings and reduces unwanted light pollution.

Nero T68 Street Light

- Extremely energy efficient - up to 140 lm/W
- High Luminous flux - up to 21000 lm
- Maintenance flap for quick access to the driver compartment
- Excellent heat dissipation and modern design
- Slim and compact profile for maximum wind resistance
- No wires are being exposed to the sun and rain
- Durable and long-lasting power driver (flicker-free for models above 50W)
- Circuit interrupter for maintenance access
- Adjustable installation angle
- IP66 for all weather conditions

Certifications

Modern Street lights play a vital role when it comes to the safety and security on our streets, in parks and in urban areas.

Our Nero T68 Street Light was designed to contribute to these aspects while still being affordable and without compromising on light quality or energy efficiency. During daytime the aesthetic yet unobtrusive design will perfectly blend-in while during dark hours its full long-lasting potential will unfold and illuminate where safety and security are essential. A wide wattage range from 30W to 150W, lenses for different beam angles and a suitable selection of slip-fitters for different pole sizes guarantee the right setup for most areas of application. If needed, a quick maintenance flap allows fast and easy access to the driver compartment. Optional daylight and motion sensors potentially enhance power savings and reduce unwanted light pollution.

Edison T60D (LED Parking Lot Light | Area Light | Street Light)

- Streamlined modern design
- Up to 160 lm/W
- Multiple choices for mounting
- IP66 and 5 years warranty

Certifications

The new Edison T60D (LED Parking Lot light | Area light | Street light) is an exceptional fixture of value and performance. The product range has been upgraded to reach very high efficacy up to 160 lm/W and cover lumen packages between 9,000 – 48,000 lumens. The range includes 480V high voltage and various sensor versions, such as photocell and motion sensor for further increasing the energy savings.

Page 91

AIO601

AIO601 LED Solar Street Light

- Luminous efficacy up to 150 lm/W
- Energy saving and environmental protection
- Easy configuration with remote control
- Microwave sensor ensures maximum uptime
- Multi-angle installation
- There is no need to dig trenches and wiring, which helps to maintain the integrity of the landscape
- One-piece design makes installation easier
- The structure of light source cavity, PV panel and controller is sealed, and the protection level of the shell can reach IP66

Certifications

CE RoHS 2 YEAR WARRANTY

AIO601 With microwave intelligent sensor, it can automatically detect the movement of objects. As long as people move, the light will automatically turn on; After sunset, the light will automatically turn on. When the sun is about to set, the sensor detects that the sky is dark, and when the darkness reaches a certain level, the light will be automatically turned on; when the sun rises, the sensor detects that the sky is getting brighter, and when the light reaches a certain level, there is no need for street lights at this time, and the street lights will automatically turn off. Infrared remote control is available, and there are multiple working modes to choose from. As we all know, under the same conditions, the higher the luminous efficiency of a lamp, the more power it saves, and this street lamp has a high luminous efficiency of over 150lm/W, which means It is almost the highest luminous efficiency of solar street lights on the market, I believe it will help you greatly save electricity and energy; What would happen without the sun? It will use the energy it has stored before to light up the street lamps, and its smart mode can continuously supply lamps to work for 3-4 days in rainy days; In terms of installation, its lamp head can be used for 40/50mm light poles at the same time, and can be installed horizontally and vertically, as well as on the wall. Note: Please install it in a sunny area outdoors, and make sure the back solar panel is facing the sun so that it can absorb more energy during the day. Its weight is extremely light, because its whole body is made of ABS plastic, a small light pole is enough to carry its weight, which makes its installation very labor-saving.

Applications:

Champion T37 Flood Light

- Modern and elegant design
- Up to 180lm/W
- From 30W to 300W full range
- IP65 grade protection
- Different beam angle for options
- Asymmetrical light distribution is optional

◆ Area light / Sport light

◆ Street light

◆ Billboard lighting

Certifications

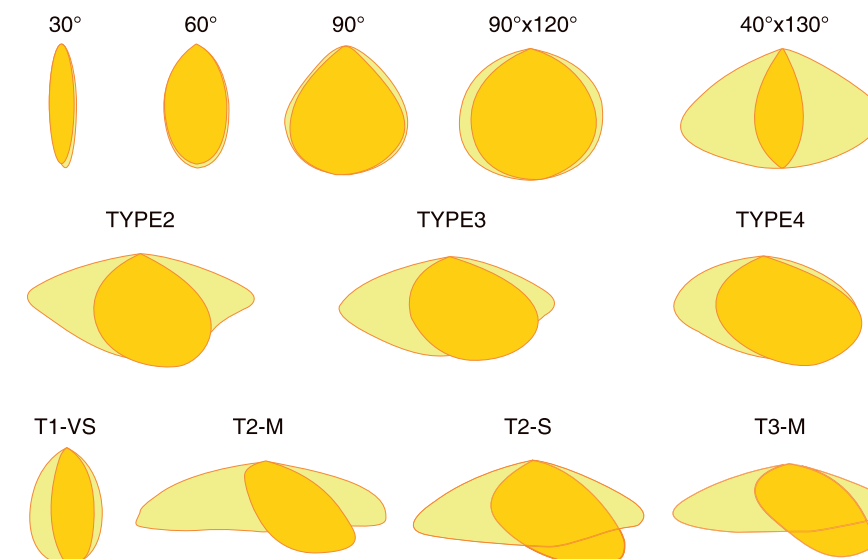

The **Champion T37 Flood Light** is a cost-effective solution, with full range of wattage and optional light distribution, T37 is available for multiple applications. Multiple light distribution for different applications even for stadium and billboard. It can also be used as street light with slip fitter mounting accessory.

Satellite T34B Flood Light

- Removable junction box for easy installation and maintenance
- Robust and 180° rotatable bracket
- Each module rotatable individually $\pm 90^\circ$
- IP65 grade protection

Certifications

The Satellite T34B Modular Flood Light is a robust design for various outdoor applications.

Each module can work independently and the fixture is equipped with a removable junction box, which is good for easy installation and maintenance. Each single module can be rotated $\pm 90^\circ$, while the overall module can be rotated 180° , it meets the requirement of the different angle rotation. Besides, thanks to the tempered glass cover, the Satellite T34B Flood Light is able to be corrosion-resistant for challenging environments, suitable for small and medium-sized stadiums, high mast, farm and warehouse, etc.

Specifications:

S6 Series LED Sports Light

- Highly energy efficient - up to 150 lm/W
- 500W / 600W / 1000W / 1200W
- 10° / 15° / 20° / 25° / 40° / 50° / 60° / 90° / 80×160° / TYPE2-M / TYPE3-M Beam angles available
- Accessory hood, safety rope, sight optional
- 5 years warranty

Certifications

S6 is a high-power modular design. Private mold with special appearance. And it's a High cost efficiency solution for outdoor lighting. With a hood appearance design to prevent light divergence, which makes the light is better gathered. A variety of angle options to meet different applications of lighting requirements. Adjustable installation angle of 0-180 degrees rotating. One-piece power installation or separate power installation optional.

3606 Sports Light

- High efficiency up to 150lm/W
- Various beam angle options
- From 200W to 600W full range
- 5 Years warranty

Certifications

3606 sport light is a new type of court light designed for industrial and commercial lighting, which can be widely used in single buildings such as light exterior lighting in buildings, indoor local lighting, green landscape lighting, billboard lighting and other lighting. The ultra-wide operating temperature and silver design provide excellent cooling abilities and a long life span. High quality material and superior workmanship make it obtain high light efficiency output.

Star Spot Plus 3612 Sports Light

- Up to 2400W
- Highly energy efficient - up to 180 lm/W
- 10° / 18° / 30° / 60° / 90° / 110° x140° Beam angles available
- IP66 & IK10
- Class 17 Wind Resistant Rating
- 3G Anti-seismic Rating
- Integrated version or Remote version
- 5 years warranty

Certifications

The **Star Spot Plus 3612 Sports Light** is an innovative LED lighting solution for sports lighting and high mast area lighting.

Full series available from 400W to 2400W, high luminous efficiency up to 180lm/W.

One module can provide a maximum power of 500W, reducing the weight of the luminaire as much as possible while ensuring perfect heat dissipation, facilitating transportation, installation, and reducing costs.

It designed with Class 17 wind resistant rating , 3G Anti-seismic rating, built-in 20KV surge protector, also with narrow/wide/asymmetric beam angle optional, it can be used for general applications and ultra-high brightness applications such as Port, Sports stadiums, Football Field, Airports, Tower Crane, Golf Course, Square, Wharf etc.

Honor T35 Sports Light

- As high as 150lm/W, 150,000lm maximum
- Easy installation and lower labor cost
- High level of lighting quality, flicker free
- Multiple light distributions including 15° narrow beam angle
- The angle of each module can be adjustable
- Each module can be replaced to minimize maintenance costs
- Both integrated version and remote version

Certifications

CE RoHS CB 5 YEAR WARRANTY

The newest **Honor T35 Sports Light** is robust and modern design. It is an ideal solution for sports and multifunctional lighting applications. HONOR T35 flood light offers outstanding light quality, effective thermal management, and long lifetime. The floodlight range includes 400W, 500W, 650W, 750W, and 1000W with different beam angle options.

Applications:

The Winner T35B Sports Light is ideal for sports field lighting, back yard sports courts, parks, signs, parking lot lighting, and other general applications where sports lighting may come into use. It has wattages ranging from 300 watts to 1000 watts. With different beam spreads available, we can adjust your LED sports light fixture output to eliminate dark spots on your sports field.

Winner T35B Sports Light

- Heavy-Duty, lightweight and durable die-cast design
- Compact design with no expose electronics or wiring
- As high as 150lm/W system light efficiency
- High level of lighting quality, flicker free

Star Spot 3605 Sports Light

- Highly energy efficient - up to 150 lm/W
- IP66 for indoor and outdoor use under all conditions
- Robust and modern design
- Long lifetime due to high quality LED chips and drivers
- 10KV Surge Protection

Certifications

Star Spot 3605 Sports Light is designed for industrial and commercial lighting harboring the newest LED lighting technology for a wide range of applications. High grade materials and perfect workmanship provide excellent cooling abilities, low maintenance costs and a long lifespan. The enormous light output and the high efficiency make this modular Highbay an ideal replacement for all sorts of traditional industrial lamps.

TNC701 Tunnel Light

- Extremely energy efficient - up to 160 lm/W
- High Luminous flux - up to 38400 lm
- Multiple beam angle design, perfect choice for tunnel areas
- Soft light increases visual comfort and safety
- IP65 and IK10
- 3 Years warranty

Certifications

The TNC701 module design can be used as Flood light and Tunnel light. Its robust aluminum housing and highly developed driver provides excellent heat dissipation and a longer lifetime. With LM80 EMC2835 high-grade led chips, its efficiency of up to 160lm/w can help customers save energy and cost. Different beam angle options can satisfy customers demanding high visual comfort. It's an ideal solution for tunnel areas, specially designed for locations with tunnels, underpasses, underbridges, traffic tunnels, and other outdoor lighting, etc.
